Muhammad Naufal Ramadhan

Klagenfurt am Wörthersee, Austria | muhnaufalramadhan27@gmail.com | muhnaufalramadhan.my.id |
github.com/schrundeng | linkedin.com/in/muhammad-naufal-ramadhan-132b69263

Skills

Languages: Python, JavaScript, TypeScript, PHP, SQL, HTML5, CSS3
Frameworks & Libraries: React.js, FastAPI, Vue.js, Nuxt, Laravel, Tailwind CSS
Developer Tools & Systems: Git, Linux (Debian), Proxmox VE, PostgreSQL, MySQL, Docker, Figma
Languages: English (C1, IELTS 7.0), Indonesian (Native)

Experience

Software Developer Intern, Universitas Negeri Malang– Malang, Indonesia — July 2024 – Aug 2024

- Developed a web-based internal issue tracking application to streamline campus IT support requests
- Configured client-server system environments for campus-wide computerized examinations
- Performed hardware maintenance, network diagnostics, and workstation troubleshooting across labs

Projects

Green Event | Laravel, Vue.js, PostgreSQL, Tailwind CSS — ilovelarp.com

- Engineered an environmental event web platform featuring interactive geospatial map visualization
- Implemented RESTful backend services, database schemas, and secure authentication flows
- Designed responsive user interfaces ensuring seamless cross-device compatibility

Crusts & Daisies | Vue.js, Laravel, MySQL, Figma — there's no limit to larp

- Designed and developed a full-stack web application for retail storefront and inventory management
- Built interactive UI components in Vue.js directly translating design prototypes created in Figma
- Structured relational database tables and API endpoints for product catalog operations

Legislative Document & Operations Portal | Pure PHP (MVC), MySQL, Caddy, Docker — larpsonaaaa

- Designed a centralized governance portal replacing fragmented document workflows across WhatsApp groups and Google Forms
- Built complete document lifecycle pipelines with auto-generated tracking IDs, role-based review states, and automated archival
- Refactored an unoptimized React and FastAPI prototype into lightweight vanilla JavaScript, eliminating layout thrashing to achieve smooth performance across a variety of devices
- Containerized the application stack with Docker and deployed it with automated Caddy SSL reverse-proxy routing

Self-Hosted Infrastructure & Game Server | Proxmox VE, Linux, Caddy

- Maintained a bare-metal hypervisor hosting containerized web applications, Cloudflare tunnels, and automated backups
- Deployed and managed a 14-player concurrent game server on constrained hardware (i3, 8GB RAM), optimizing JVM garbage collection, chunk rendering loads, and VM disk trimming

Education

Universität Klagenfurt (AAU) – BSc Robotics and Artificial Intelligence (VAAU) — Oct 2026 - Present
SMK Telkom Malang – Vocational High School Diploma in Software Engineering — July 2022 - July 2025
